PROFESSIONAL SUMMARY

A motivated Full Stack Developer with strong hands-on experience in the MERN stack (MongoDB, Express.js, React.js, Node.js) and Android mobile app development using React Native. Passionate about building modern, scalable, and user-focused web and mobile applications with clean UI/UX design, RESTful API development, and efficient database management.

Gained practical experience through academic and personal projects, including CollaXion, where I worked on real-world system design, authentication, and collaboration features. Always eager to enhance existing applications and build better, more optimized solutions through continuous learning and improvement. Team player with the ability to multitask and strong proven analytical thinking and problem-solving skills, areas of functional expertise:

- MERN Stack Development
- Android Mobile App Development (React Native)
- RESTful API Design & Integration
- Agile & Scrum Development Practices
- Quick learner and adaptable to new technologies
- UI/UX Design & Responsive Web Development
- Authentication Systems & Database Management skills
- Real-Time Collaboration System Design

Full Stack Developer | Academic & Projects | 2022-2026

Riphah International University, Islamabad

- Designed and developed multiple production-grade web and mobile applications ensuring scalability, performance, and responsive UI/UX.
- Built full-stack MERN applications with secure authentication systems, RESTful APIs, and MongoDB database integration.

- Developed Android mobile applications using React Native with responsive UI and smooth performance.
- Collaborated in a team environment using structured task planning and GitHub-based workflows to ensure timely project delivery.
- Implemented MongoDB database integration with secure authentication and efficient data management across multiple MERN stack projects.
- Followed full software development lifecycle including requirement analysis, design, development, testing, and deployment.
- Built Food Fusion, a full-stack MERN restaurant web application with online ordering and table reservation system.
- Designed Stitch & Style, a mobile application for tailor order management, customer measurements, and delivery tracking.
- Developed a Hospital Management System (Java) for managing patient, doctor, and staff records.
- Created a responsive Food Website (HTML, CSS) for menu showcasing and business services.

RELEVANT PROJECTS

CollaXion - Collaborative Workspace Platform

CollaXion is a full-stack collaborative platform designed for teams to manage tasks, communicate, and work together in real time.

- Developed CollaXion - AI-powered University-Industry Collaboration Platform using MERN stack and React Native, enabling web and mobile access with role-based system for Students, Industry, Internship Incharge, and Liaison, along with secure JWT authentication and multi-stage approval workflow.
- Integrated Gemini AI for CV parsing, skill extraction, and internship recommendations along with MoU management, advisory meetings, events, real-time chat using WebSocket, and Google Maps based industry discovery.

Food Fusion - Full Stack Restaurant Web Application

MERN-based restaurant platform with online ordering and table reservation system.

- Built a MERN restaurant **app** with auth, menu, cart, ordering, and tracking.
- Added **table** booking system with time slots, admin approval, and responsive UI.

Stitch & Style - Tailor Management Mobile App

React Native mobile application for tailor shop management and order tracking.

- Built a React Native tailor management app with customer profiles, measurements, and order tracking.
- Integrated Firebase auth and real-time order updates from order placement to delivery.

Hospital Management System - Java

- Developed desktop application using Java for managing patients, doctors, and staff records.
- Applied OOP principles for modular, scalable system design.

Food Website

- Designed fully responsive static website for restaurant menu and service showcase.
- Focused on mobile-first design, clean layout, and cross-browser compatibility.

SOFTWARE ENGINEER

EDUCATION & TRAINING COURSE

EDUCATION

Bachelor of Software Engineering Riphah Internation University Islamabad, Gulberg Green Campus

Intermediate. Punjab Group College, Wah Cantt

Matric. F.G. Girls High School NO.8, Wah Cantt

TRAINING COURSE

Completed hands-on training in **MERN, React Native, HTML/CSS, Software Engineering, and Photoshop.**
